

A METHOD OF RECORDING AUDIOVISUAL CONTENT IN A
COMMUNICATIONS NETWORK

A B S T R A C T

5

According to the invention, said communications
network including at least one network recorder able to
record audiovisual content broadcast on a plurality of
broadcast channels, said audiovisual content being
10 recorded at the request of a user having a communications
terminal able to communicate with at least one network
recorder, said method comprises the following steps:

- the network recorder identifying itself,
indicating at least:
15 * a means of access to said recorder,
 * a list of broadcast channels,
 · the user selecting a network recorder able to
record at least one required audiovisual content and
connecting thereto using said access means in order to
20 request the recording of said at least one audiovisual
content, said request including an identification of the
audiovisual content to be recorded, and
 · the network recorder sending a response to the
user's recording request containing, if the request is
25 accepted, an identification of the accepted recording
request for each content to be recorded.

Application to remote recording of audiovisual
content.
